

AI Tools for Professional Flutter Developer

1. ChatGPT: Mentor, roadmap, debugging, architecture, documentation, interview prep.
2. GitHub Copilot: AI pair programmer, autocomplete, boilerplate, refactoring, tests.
3. Cursor AI: AI code editor, project understanding, editing, refactoring.
4. Claude: Large project analysis, clean architecture, code review.
5. Gemini: Flutter, Firebase, Android & Google services assistance.

Supporting Tools: Android Studio, VS Code, Flutter DevTools, Firebase Console, Postman/Bruno, Figma, GitHub, Codemagic, LottieFiles, SVG Repo.

Workflow: Idea → ChatGPT → Figma → Cursor → Copilot → Gemini → Claude → DevTools → GitHub → Codemagic → Play Store.

Golden Rule: Use AI as a teacher, reviewer, debugger and pair programmer—not as a replacement for your own learning.
